## Explanation of the Articles in the Calendar.

The pages are calculated for Toronto, Quebec, Fredericton and Halifax, and for ordinary purposes will serve with sufficient accuracy for every city in the Dominion of Canada.

The times of the SUN'S RISING and SETTING are given for the upper limb, and are corrected for refraction for Toronto, Quebec, Fredericton, Halifax and Fort Garry.

The civil times both for the rising and setting of the Moon's centre are given for every day for Toronto, Quebec, Fredericton, Halifax and Fort Garry.

The column, SUN ON MERIDIAN, gives the time that a watch should show when the shadow of a sun dial is on the noon mark.

MOON'S AGE.—This column shows to the nearest tenth of a day the Moon's age at Toronto, noon.

The column, MOON ON THE MERIDIAN, gives the mean time at which the Moon's centre passes the meridian of longitude 4h. 46m. W. When in the column headed Moon's rising or setting, or Moon on meridian, the letters A.M. occur, unaccompanied by any number, they denote that the numbers given for the succeeding days relate to the morning, and those for the preceding days to the afternoon, and that the Moon does not rise or set or cross the meridian (as the case may be) on that day.

The MOON'S MERIDIAN ZENITH DISTANCES are given to the nearest tenth of a degree for a point in latitude 45° and longitude 4h. 46m. W. They are not corrected for parallax or refraction.

The column, UPPER TRANSIT OF POLE STAR, shews for every day the mean time at which the Pole Star makes its upper transit across the meridian of longitude 4h. 46m. W. It passes the meridian in the morning from April 9 to October 10. It passes the meridian twice on October 9; and in the afternoon during the rest of the year.

The time at which the lower transit of the Pole Star occurs may be found by adding 11h. 58m. 2s. to the time of the preceding upper transit.

The six last columns will serve with sufficient accuracy for the whole of Canada.

From the time of the upper transit of the Pole Star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table.

Latitude .....	42°	43°	44°	45°	46°	47°	48°	49°	50°

MOON'S PHASES.—This Table gives the times for the four meridians when the Moon passes the geocentric longitudes of 0°, 90°, 180°, and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

TWILIGHT.—In this Table are given the times at which twilight begins in the morning and ends in the evening, &c., the times when the Sun's centre is 18° below the horizon.

GREATEST ELONGATION OF THE POLE STAR.—This column gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 45°. When the greatest elongation corresponding to any other latitude is required, the number given in the column should be corrected by means of the following Table.

The 1st correction for the degrees of latitude is to be subtracted from the greatest elongation given in the calendar or added to it, according as the degrees of latitude are less or greater than 45°.

The 2nd correction, which is always additive, is found by multiplying the number given in the third line of the Table by the number of minutes in the latitude.

Thus for latitude 43° 20'...1st correction	= -3' 51"	2nd correction	+1.9 × 20 = +0' 38"
" " 47° 40'... "	= +4' 16"	" "	+2.3 × 40 = +1' 32"
" " 45° 10'... "	= -9' 0"	" "	+2.1 × 10 = +0' 21"

THE PLANETS.—The times of rising and setting of the five chief planets are calculated for Toronto, and are corrected for refraction. The times of culmination, although computed for the meridian of Toronto, will serve approximately for the whole of Canada. The meridian zenith distances, being designed merely to aid in finding the planets, have been given only to the nearest tenth of a degree, as seen from the latitude of 45°.

### Star Table.

From the times of the upper transit of the Pole Star may be derived, with the aid of the following Table, the times of culmination, and of the rising and setting of the principal fixed stars, as seen from the parallel of 45° north latitude.

To ascertain when any star found in the following Table will be on the meridian, add the number in the left-hand column of figures to the preceding meridian transit of the pole star given in the calendar. To find the time of rising of a star, subtract the number opposite to it in the right-hand column of figures from the time of its meridian passage. For the setting of a star, add the same number to the time of its meridian passage. Those stars marked (....) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 45°.

## FISHERIES OF THE DOMINION.

The gross value of the produce of these fisheries in 1876 is \$11,147,590. This amount includes the value of fish taken in British Columbia and Manitoba, \$135,287 75. The catch of these two Provinces not having been reckoned in the tables for 1875, any comparison between that year and the present one must be made without reckoning such sum. The increased value of this year's production is therefore \$661,917.

The rate of postage on a letter posted within the Dominion of Canada for transmission by mail to any place in Canada, 3 cents per  $\frac{1}{2}$  oz. weight; but the Statute provides that this rate must be prepaid by postage stamp at the time of posting a letter.

Any such letter posted wholly unpaid (or prepaid less than one full rate of three cents), cannot be forwarded to its destination, but will be sent to the Dead Letter Office, with the reason plainly written or marked upon it—"Postage not prepaid."

Letters as aforesaid posted in Canada, and addressed to places in Canada, when weighing more than  $\frac{1}{2}$  an oz., and liable therefore to two or more rates of postage, will be transmitted by mail to destination, though not fully

prepaid, if as much as one full rate of 3 cents has been prepaid thereon by postage stamp; and in such cases will be forwarded charged with double the amount of deficient postage not prepaid: Thus, if such a letter weighing more than  $\frac{1}{2}$  oz. and not exceeding 1 oz. in weight, be posted prepaid 3 cents only, it will be rated 6 cents unpaid—"More to pay"—and forwarded to its address.

## POST OFFICE SAVINGS BANK, CANADA.

Post Office Savings Banks in Ontario and Quebec are open daily for the receipt and repayment of deposits, during the ordinary hours of Post Office business.

The direct security of the Dominion is given by the Statute for all deposits made.

Any person may have a deposit account, and may deposit yearly any number of dollars, from \$1 up to \$300, or more with the permission of the Postmaster-General.

Deposits may be made by married women, and deposits so made, or made by women who shall afterwards marry, will be repaid to any such woman.

Deposits for children under 10 yrs. of age may be made—  
 Firstly—By a parent or friend as trustee for the child, in which case the deposits can be withdrawn by the trustee until the child shall attain the age of ten years, after which time repayment will be made only on the joint receipts of both trustee and child.

Secondly—In the child's own name—and, if so deposited, repayment will not be made until the child shall attain the age of ten years.

A depositor in any of the Savings Bank Post Offices may continue his deposits at any other of such offices, without notice or change of Pass Book, and can withdraw money at that Savings Bank Office which is most convenient to him.

Each depositor is supplied with a Pass Book, which is to be produced to the Postmaster every time the depositor pays in or withdraws money, and the sums

paid in or withdrawn are entered therein by the Postmaster receiving or paying the same.

Each depositor's account is kept in the Postmaster-General's office, in Ottawa, and in addition to the Postmaster's receipt in the Pass Book, a direct acknowledgment from the Postmaster-General for each sum paid in is sent to the depositor. If this acknowledgment does not reach the depositor within ten days from the date of his deposit, he must apply immediately to the Postmaster-General, by letter, being careful to give his address, and, if necessary, write again, because the Postmaster's receipt or entry in the Pass Book is not sufficient without the further receipt for the money from Ottawa.

Every depositor must send his book once a year, viz., on the anniversary of his first deposit, for comparison with the books of the Department, and for insertion of interest. The book will be returned to him by first mail. At no other time should a depositor suffer his book to be out of his own possession.

When a depositor wishes to withdraw money, he can do so by applying to the Postmaster-General, who will send him by return mail a cheque for the amount, payable at whatever Savings Bank Post Office the depositor may have named in his application.

Interest at the rate of 4 per cent. per annum is allowed on deposits, and the interest is added to the principal on the 30th June in each year.

LEGAL AND JUDICIARY.

SUPREME COURT OF THE DOMINION AND COURT OF EXCHEQUER.

The Supreme Court, as a high Court of Appeal, constituted by Dominion Statute, 33 Vic. cap. 2, assented to 8th April 1875, is composed of a Chief Justice and five Puisne Judges, and has appellate civil and criminal jurisdiction within and throughout the Dominion of Canada. The Judges reside at Ottawa, where the Supreme Court holds annually two Sessions, beginning respectively on the third Monday in January and June. The Exchequer Court, presided over by the same Judges, possesses concurrent original jurisdiction in the Dominion in all cases in which it is sought to enforce any law relating to the revenue, and exclusive original jurisdiction in all cases in which demand is made or relief sought in respect of any matter which might in England be the subject of a suit or action in the Court of Exchequer on its revenue side against the Crown, or any officer of the Crown.

Hon. William Buell Richards, Chief Justice.  
 Hon. William Johnston Ritchie, Puisne Judge.  
 Hon. Samuel Henry Strong, Puisne Judge.  
 Hon. Jean Thomas Taschereau, Puisne Judge.  
 Hon. Telephone Fournier, Puisne Judge.  
 Hon. William Alexander Henry, Puisne Judge.  
 R. Cassells, Jun., Registrar.

THE LAW SOCIETY OF ONTARIO.

The Law Society was first established in 1797, by the act 37 Geo. III. c. 13, which enabled the then practitioners of the law to form themselves into a society and make rules for its government. By the act of 1822, 2 Geo. IV. c. 5, “the Treasurer and Benchers of the Law Society” were formally incorporated; and under these and other statutes the Society has continued to be governed by a Board of Benchers, in the same manner as the various Law Societies of England. By the act 34 Vic. c. 15, the Benchers theretofore appointed from time to time by their own body, are made, exclusive of *ex officio* members, elective by the Bar, the *ex officio* consisting of the Attorney General for the time being, and all members of the Bar of Ontario who have at any time held the office of Attorney or Solicitor General of the former province of Upper Canada, and any retired Judge of the Superior Courts of Law or Equity of Ontario; the *elective*, thirty in number, being chosen by ballot, for a term of five years, by the members of the Bar, in manner prescribed by the Act. Vacancies during the term are filled by the remaining Benchers. The Judges of the Superior Courts are Visitors of the Society, and, on the first day of Easter Term, annually, the Benchers appoint one of their body to be Treasurer, who is also President of the Society. The Benchers sit in convocation every term for the call of Barristers, the admission of Attorneys and Solicitors to practise, and of Students to enter the Society, the fees paid by whom form the revenue of the Society. Osgoode Hall, appropriately named after the first Chief Justice, is the Ontario “Inn of Court,” or headquarters of the Society, in which is provided accommodation for

the Courts of Equity, and for the sittings in term of the Superior Courts; with a valuable and extensive library.

Chambers are held each day in Common Law and Chancery by one of the judges of the said courts, and under recent statutes by the clerk of the Crown and Pleas in common law, and by the referee in chambers in chancery, for such business relating to suits therein as may be transacted by a single judge out of court. *Clerk, Common Law Chambers*—W. **COURTS FOR THE TRIAL OF CONTESTED ELECTIONS.**—The nature of these Courts is sufficiently indicated in their title. The Judges of the Court of Appeal and of the Superior Courts of Law and Equity meet annually in Michaelmas Term, and severally select, by a majority of votes, a Judge of their respective Courts to be placed on the rota for the trial of election petitions. In the case of death or illness of a Judge so chosen, the Court of which he is a member meet and elect another Judge. At trials referring to the Dominion of Parliament, two Judges preside, and appeals lie to the Supreme Court at Ottawa. At those relating to the Legislature of Ontario, a single Judge presides, and the appeal is to the Court of Appeal of that Province.

**COUNTY COURTS.**—Presided over by a resident Judge in each county, assisted in some counties by a Deputy or Junior Judge. Their jurisdiction extends to all personal actions where the debt or damages claimed do not exceed \$200; and to all suits relating to debt, covenant or contract, where the amount is ascertained by the acts of the parties or signature of the defendant, to \$400; and to all bail bonds and recognizances of bail given in the County Court, to any amount; but not to cases involving the title to lands, validity of wills, or actions for libel, slander, criminal, or seduction. An appeal lies to the Court of Appeal of Ontario.

**COUNTY COURT SITTINGS AND COURTS OF GENERAL SESSIONS.**—The County Judge in each county holds a sitting of his Court and a Court of General Sessions in his county semi-annually on the second Tuesday in June and December, except in the county of York, in which county said court is held four times, commencing on the second Tuesday in March, May, September and December, the latter Courts for the trial of cases of felony and misdemeanor, but treason and capital felonies are exempted from their jurisdiction. The Judge may also, in his discretion, hold additional sittings at such times as may be deemed expedient to expedite business, but only for the trial of issues of fact without a jury.

**COUNTY JUDGES' CRIMINAL COURT.**—Persons committed to jail for trial, on charge of being guilty of any offence for which they may be tried at a Court of General Sessions, may, with their own consent, and subject to the provisions of the Act in that behalf, be forthwith tried by the Judge of the County Court and General Sessions without a jury, and if convicted, be sentenced by the said Judge; and the Judge sitting on any such trial for all the purposes thereof, is constituted a Court of Record, and the record in any such case shall be filed among the records of the Court of General Sessions last mentioned.

**COURTS OF REVISION.**—The County Judges hold annually Courts of final revision of the Assessment Rolls of each

Municipality, being in the light of Courts of Appeal from the first Court of Revision held by the Municipality; and also Courts for the Revision of the Voters' Lists, being equivalent to the Courts held by Revising Barristers in England.

**INSOLVENT DEBTORS' COURTS.**—These courts, which have reference to traders only, are regulated by the Act known as "the Insolvent Act of 1875," which consolidated and assimilated the practice in Bankruptcy and Insolvency in the several Provinces of the Dominion. The County Judges in the several counties preside, and official assignees are nominated by the Governor in Council, and are officers of the Court having jurisdiction in the County or District for which they are appointed. An appeal lies to the Court of Appeal of Ontario.

**SURROGATE COURTS.**—The jurisdiction of these Courts relates to all testamentary matters and causes, and to the granting or revoking of probate of wills, and letters of administration of the effects of deceased persons having estate or effects in Upper Canada, and all matters arising out of or connected with the grant or revocation of probate or administration, subject to an appeal to the Court of Chancery. The County Judges are also Judges of the Surrogate Courts. *Chief Surrogate Clerk at Toronto*—Sir J. L. Robinson, Bart.

**DIVISION COURTS**, for the summary disposal of cases by the presiding Judge, being the County Judge or his Deputy, or any Barrister appointed to hold the same; but a jury of five persons may be demanded in certain cases. Their jurisdiction extends to actions of debt or contract amounting to \$100; injuries or torts to personal chattels amounting to \$40; and personal actions to that amount, if not excepted from their jurisdiction; but not to actions for gambling debts, liquors drunk in a tavern, or notes of hand given therefor, ejectment, title to land, &c., or any toll, custom or franchise, will or settlement, malicious prosecution, libel, slander, crim. con., seduction or breach of promise, or actions against a J. P. for anything done by him in the execution of his office, if he objects to it. Each judicial district is divided into court divisions, and courts are held once in two months in each division, or oftener, at the discretion of the Judge. The Divisions are established by the Courts of General Sessions, and in certain cases by the Judges.

the County and Town Councils. In cities the Trustees are all appointed by the City Council, except where there is only one school in the county. The head master must be a graduate of a British or Colonial University, unless certified and appointed before 18th September, 1865. Besides fees, local rates to the extent of half the Government grant must be raised for the master's salary. The grant is payable to those schools only which attain a certain standard, and is based on the average attendance of pupils in the prescribed studies. High Schools which have an average attendance of 60 male classical pupils, may be made Collegiate Institutes, and receive \$750 additional grant. An extra grant is provided for masters taking certain meteorological observations and giving scientific knowledge preparatory to military instruction. Pupils attending these Schools are prepared for matriculation in the Universities. There were 96 High Schools and 8 Collegiate Institutes, with 8,541 pupils, in Ontario in 1876. James A. # WATERS' ORCHESTRION CHIME ORGANS

### Testimonials of Waters' Orchestrion Chime Organs.

The New York Times says: "Waters' Orchestrion Chime Organ is a beautiful little instrument, simply perfect. The chime of two and one-half octave bells, and the artistic effects capable of being produced by the player, are singularly fine."

"The tone is full, clear and resonant, and a very interesting effect is produced with the chime of bells."

### Testimonials of Waters' Souvenir Organs.

J. O. WEAVER, York, Pa., says, "I like the style of the Souvenir very much. I think it is very pretty. I have examined the material and construction, and find that it is made to be durable. The convenient arrangement to take the Organ apart, and the Stop-action, are admirable."

M. R. BARNES, McArthur, Ohio, says, "The Souvenir has arrived, and has been tested along with Burdett's, George Wood's, etc. It has not suffered by the comparison. I like the style very much. It came in perfect order, being thoroughly packed."

W. W. MOORE, Eldora, Iowa, writes, "I will say, in regard to the Souvenir Organ sent me, that it is the best toned Organ in the market. I have been in the Piano and Organ trade over two years, and have not found an Organ that meets the demand of the people like the Souvenir. I have sold some of the leading Organs—Estey, Burdett, Taylor & Farley, and Whitney & Holmes. I have just sold one Souvenir Organ in a house where they have had an Estey for six years."

## Explanation of the Articles in the Calendar.

The pages are calculated for Toronto, Quebec, Fredericton and Halifax, and for ordinary purposes will serve with sufficient accuracy for every city in the Dominion of Canada.

The times of the SUN'S RISING AND SETTING are given for the upper limb, and are corrected for refraction for Toronto, Quebec, Fredericton, Halifax and Fort Garry.

The civil times both for the rising and setting of the Moon's centre are given for every day for Toronto, Quebec, Fredericton, Halifax and Fort Garry.

The column, SUN ON MERIDIAN, gives the time that a watch should show when the shadow of a sun dial is on the noon mark.

MOON'S AGE.—This column shows to the nearest tenth of a day the Moon's age at Toronto, noon.

The column, MOON ON THE MERIDIAN, gives the mean time at which the Moon's centre passes the meridian of longitude 4h. 46m. W. When in the column headed Moon's rising or setting, or Moon on meridian, the letters A.M. occur, unaccompanied by any number, they denote that the numbers given for the succeeding days relate to the morning, and those for the preceding days to the afternoon, and that the Moon does not rise or set or cross the meridian (as the case may be) on that day.

The MOON'S MERIDIAN ZENITH DISTANCES are given to the nearest tenth of a degree for a point in latitude 45° and longitude 4h. 46m. W. They are not corrected for parallax or refraction.

The column, UPPER TRANSIT OF POLE STAR, shows for every day the mean time at which the Pole Star makes its upper transit across the meridian of longitude 4h. 46m. W. It passes the meridian in the morning from April 10 to October 10. It passes the meridian twice on October 10; and in the afternoon during the rest of the year.

The time at which the lower transit of the Pole Star occurs may be found by adding 11h. 58m. 2s. to the time of the preceding upper transit.

The six last columns will serve with sufficient accuracy for the whole of Canada.

From the time of the upper transit of the Pole Star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table.

Latitude .....	42°	43°	44°	45°	46°	47°	48°	49°	50°

MOON'S PHASES.—This Table gives the times for the four meridians when the Moon passes the geocentric longitudes of 0°, 90°, 180°, and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

**TWILIGHT.**—In this Table are given the times at which twilight begins in the morning and ends in the evening, *i.e.*, the times when the Sun's centre is 18° below the horizon.

**GREATEST ELONGATION OF THE POLE STAR.**—This column gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 45°. When the greatest elongation corresponding to any other latitude is required, the number given in the column should be corrected by means of the following Table.

Latitude .....	42°	43°	44°	45°	46°	47°	48°	49°	50°
1st Correction for Degrees.....	—5' 38"	—3' 51"	—1' 59"	0' 00"	+ 2' 4"	+ 4' 16"	+ 6' 35"	+ 9' 2"	+ 11' 37"
2nd Correction for each minute of latitude .....	+ 1".8	+ 1".9	+ 2".0	+ 2".1	+ 2".2	+ 2".3	+ 2".4	+ 2".6	+ 2".7

The 1st correction for the degrees of latitude is to be subtracted from the greatest elongation given in the calendar or added to it, according as the degrees of latitude are less or greater than 45°.

The 2nd correction, which is always additive, is found by multiplying the number given in the third line of the Table by the number of minutes in the latitude.

Thus for latitude 43° 20'...1st correction =	—3' 51"	2nd correction	+ 1.9 × 20 =	+ 0' 38"
" " 47° 40'... " " " " " "	+ 4' 16"	" " " " " "	+ 2.3 × 40 =	+ 1' 32"
" " 45° 10'... " " " " " "	= + 0' 0"	" " " " " "	+ 2.1 × 10 =	+ 0' 21"

**THE PLANETS.**—The times of rising and setting of the five chief planets are calculated for Toronto, and are corrected for refraction. The times of culmination, although computed for the meridian of Toronto, will serve approximately for the whole of Canada. The meridian zenith distances, being designed merely to aid in finding the planets, have been given only to the nearest tenth of a degree, as seen from the latitude of 45°.

### Star Table.

From the times of the upper transit of the Pole Star may be derived, with the aid of the following Table, the times of culmination, and of the rising and setting of the principal fixed stars, as seen from the parallel of 45° north latitude.

To ascertain when any star found in the following Table will be on the meridian, *add* the number in the left-hand column of figures to the preceding meridian transit of the pole star given in the calendar. To find the time of rising of a star, *subtract* the number opposite to it in the right-hand column of figures from the time of its meridian passage. For the *setting* of a star, *add* the same number to the time of its meridian passage. Those stars marked (...) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 45°.

## THE YEAR.

The length of the year is strictly expressed by the space of time required for the revolution of the earth round the sun—namely, 365 days, 5 hours, 48 minutes, 49 seconds, and 7 tenths of a second, for to such a nicety has this time been ascertained. But for convenience in reckoning, it has been found necessary to make the year terminate with a day instead of a fraction of one, lumping the fractions together so as to make up a day among themselves. About forty-five years before Christ, Julius Cæsar, having, by the help of Sosigenes, an Alexandrian philosopher, come to a tolerably clear understanding of the length of the year, decreed that every fourth year should be held to consist of 366 days, for the purpose of absorbing the odd hours. The arrangement he dictated was a rather clumsy one. A day in February, the sixth before the calends of March (*sextilis*), was to be repeated in that fourth year; and each fourth year was thus to be *bissex-tile*. It was as if we were to reckon the 23rd of February twice over. Seeing that, in reality, a day every fourth year is too much by 11 minutes, 10 seconds, and 3 tenths of a second, it inevitably followed that the beginning of the year moved onward ahead of the point at which it was in the days of Cæsar; in other words, the natural time fell behind the reckoning. From the time of the Council of Nice, in 325, when the vernal equinox fell correctly on the 21st of March, Pope Gregory found in 1582 that there had been an over-reckoning to the extent of ten days, and

now the vernal equinox fell on the 11th of March. To correct the past error, he decreed that the 5th of October that year should be reckoned as the 15th, and to keep the year right in future, the overplus being 18 hours, 37 minutes, and 10 seconds in a century, he ordered that every centennial year that could not be divided by 4 (1700, 1800, 1900, 2100, 2200, &c.) should not be bissextile, as it otherwise would be; thus, in short, dropping the extra day three times every four hundred years. The Gregorian style, as it was called, readily obtained sway in Catholic, but not in Protestant countries. It was not adopted in Britain till the year 1752, by which time the discrepancy between the Julian and Gregorian periods amounted to eleven days. An Act of Parliament was passed, dictating that the 3rd of September that year should be reckoned the 14th, and that three of every four of the centennial years should, as in Pope Gregory's arrangement, not be bissextile or leap-years. It has consequently arisen—1800 not having been a leap year—that the new and old styles now differ by twelve days, our first of January being equivalent to the 13th old style. In Russia alone, of all Christian countries, is the old style still retained; wherever it becomes necessary for one writing in that country to any

foreign correspondent, to set down his date thus: <sup>12th</sup>March, or <sup>25th September</sup> 17th October; or, it may be, <sup>28th December, 1870</sup> 9th January, 1871 <sup>24th</sup>

## NOVEMBER.

Red o'er the forest peers the setting sun,  
The line of yellow light dies fast away [dun  
That crowned the eastern copse; and chill and  
Falls on the moor the brief November day.

## POST OFFICE SAVINGS BANK, CANADA.

Post Office Savings Banks in Ontario and Quebec are open daily for the receipt and repayment of deposits, during the ordinary hours of Post Office business.

The direct security of the Dominion is given by the Statute for all deposits made.

Any person may have a deposit account, and may deposit yearly any number of dollars, from \$1 up to \$300, or more with the permission of the Postmaster-General.

Deposits may be made by married women, and deposits so made, or made by women who shall afterwards marry, will be repaid to any such woman.

Deposits for children under 10 yrs of age may be made—  
First—By a parent or friend as trustee for the child, in which case the deposits can be withdrawn by the trustee until the child shall attain the age of ten years, after which time repayment will be made only on the joint receipts of both trustee and child.

Secondly—In the child's own name—and, if so deposited, repayment will not be made until the child shall attain the age of ten years.

A depositor in any of the Savings Bank Post Offices may continue his deposits at any other of such offices, without notice or change of Pass Book, and can withdraw money at that Savings Bank Office which is most convenient to him.

Each depositor is supplied with a Pass Book, which is to be produced to the Postmaster every time the depositor pays in or withdraws money, and the sums

paid in or withdrawn are entered therein by the Postmaster receiving or paying the same.

Each depositor's account is kept in the Postmaster-General's office, in Ottawa, and in addition to the Postmaster's receipt in the Pass Book, a direct acknowledgment from the Postmaster-General for each sum paid in is sent to the depositor. If this acknowledgment does not reach the depositor within ten days from the date of his deposit, he must apply immediately to the Postmaster-General, by letter, being careful to give his address, and, if necessary, write again, because the Postmaster's receipt or entry in the Pass Book is not sufficient without the further receipt for the money from Ottawa.

Every depositor must send his book once a year, viz., on the anniversary of his first deposit, for comparison with the books of the Department, and for insertion of interest. The book will be returned to him by first mail. At no other time should a depositor suffer his book to be out of his own possession.

When a depositor wishes to withdraw money, he can do so by applying to the Postmaster-General, who will send him by return mail a cheque for the amount, payable at whatever Savings Bank Post Office the depositor may have named in his application.

Interest at the rate of 4 per cent. per annum is allowed on deposits, and the interest is added to the principal on the 30th June in each year.

Besides fees, local rates to the extent of half the Government grant must be raised for the master's salary. The grant is payable to those schools only which attain a certain standard, and is based on the average attendance of pupils in the prescribed studies. High Schools which have an average attendance of 60 male classical pupils, may be made Collegiate Institutes, and receive \$750 additional grant. An extra grant is provided for masters taking certain meteorological observations and giving scientific knowledge preparatory to military instruction. Pupils attending these Schools are prepared for matriculation in the Universities. There were 95 High Schools and 9 Collegiate Institutes, with 9,229 pupils, in Ontario in 1877. James A. Hon. Samuel Henry Strong, Puisne Judge.

### THE LAW SOCIETY OF ONTARIO.

The Law Society was first established in 1797, by the Act 37 Geo. III. c. 13, which enabled the then practitioners of the law to form themselves into a society and make rules for its government. By the Act of 1822, 2 Geo. IV. c. 5, "the Treasurer and Benchers of the Law Society" were formally incorporated; and under these and other statutes the Society has continued to be governed by a Board of Benchers, in the same manner as the various Law Societies of England. By Revised Statutes of Ont. c. 133, the Benchers theretofore appointed from time to time by their own body, are made, exclusive of *ex officio* members, elective by the Bar, the *ex officio* consisting of the Attorney General of the Dominion for the time being, if a member of the Bar of Ontario, and all members of the Bar of Ontario who have at any time held the office of Attorney-General of the Dominion or of Ontario, or of Attorney or Solicitor-General of the former province of Upper Canada, and any retired Judge of the Superior Courts of Law or Equity of Ontario; the *elective*, thirty in number, being chosen by ballot, for a term of

five years, by the members of the Bar, in manner prescribed by the Act. Vacancies during the term are filled by the remaining Benchers. The Judges of the Superior Courts are Visitors of the Society, and, on the first day of Easter Term, annually, the Benchers appoint one of their body to be Treasurer, who is also President of the Society. The Benchers sit in convocation every term for the call of Barristers, the admission of Attorneys and Solicitors to practise, and of Students to enter the Society, the fees paid by whom form the revenue of the Society. Osgoode Hall, appropriately named after the first Chief Justice, is the Ontario "Inn of Court," or headquarters of the Society. In which is provided accommodation for the Courts of Equity, and for the sittings in term of the Superior Courts; with a valuable and extensive library.

P. for anything done by him in the execution of his office, if he objects to it. Each judicial district is divided into court divisions, and courts are held once in two months in each division.

# WHEELER & WILSON'S

## NEW STRAIGHT NEEDLE, LOCK-STITCH

# Sewing Machines,

### THE FOREMOST IN THE MARKET.

*Their claims to Notice are the following:—*

1. The Machines are the result of more than a quarter of a century's manufacturing experience.

2. The rotary hook (in combination with the bobbin), runs more quietly and more rapidly than the shuttle, and is, consequently, more durable.

3. A finer needle can be used in these Machines, with a thread coarser than it is possible to use in any other; a thread large enough to entirely fill the hole of the needle can be used, and thus a firmer and more beautiful stitch can be secured.

4. The needle is self-adjusting, and requires only to be placed in position.

5. Heavy seams can be crossed with them without trouble or delay.

6. As the bobbin is larger than the shuttle, it requires filling less frequently, and the under thread is more easily arranged than it can be on machines on which a shuttle is used.

7. The WHEELER & WILSON Machines have the needle-bars packed in felt, and thus prevents the oil soiling the work.

8. The bobbins do not need the application of oil; a source of annoyance is thus avoided which *they* will appreciate who have been accustomed to soil their thread and work with oily shuttles, &c.

9. The great speed and durability of the WHEELER & WILSON Machines reduce the cost of production to MANUFACTURERS, and necessarily increase the earnings of OPERATIVES.

## SPECIAL MEDICINAL PREPARATIONS, &c.

### PANCREATIC EMULSION.—MEDICINAL FOOD FOR CONSUMPTIVES.—

For persons suffering from CONSUMPTION and WASTING DISEASES, it takes precedence of Cod Liver Oil, and all Oily Emulsions. It is not only the necessary food for the Consumptive, but also the most reliable form of nutriment for counteracting the tendency to Phthisis, and other wasting diseases. It is agreeable to the taste, improves the appetite, and increases strength and weight.

**PANCREATINE** contributes essentially to the digestion and assimilation of food, while its peculiar agency in the digestion of fats and oils renders it specially valuable as an adjunct to Cod Liver Oil in preventing Nausea, &c. **PANCREATINE WINE.**—An excellent vehicle for taking Cod Liver Oil and promoting its digestion.

**PEPTODYN**—For INDIGESTION.—A combination of the whole of the digestive secretions—PEPSINE, PANCREATINE, DIASTASE, &c., and is an invaluable remedy in all forms of Dyspepsia, and all diseases arising from imperfect nutrition. Taken after eating it prevents the discomfort which often follows the partaking of a full meal, even in persons in good health.

**THE BEST FOOD FOR INFANTS.**—The **ROYAL NURSERIES** of England and Russia are supplied with this Food, which has received the approval of the Medical Profession in all parts of the world, who recommend it for its highly nutritive and digestive qualities.

**DATURA TATULA.**—In **ASTHMA**, **CHRONIC BRONCHITIS**, and other diseases of the respiratory organs, the use of "Datura Tatula" gives instant relief. "The smoke causes no nausea. I have never known an instance in which relief was not obtained." General Alexander.—*India*. Prepared as Cigars, Cigarettes, Pastiles for inhalation, and in tins for use by means of a pipe.

**JEREMIE'S SEDATIVE AND ANTI-SPASMODIC.**—This celebrated preparation has been for many years largely employed in India as a remedy for Cholera, Diarrhoea, Dysentery, &c. &c. Originated by Captain Jeremie, Opium Department, India, &c. Sold in bottles.

**MEDICINE CHESTS.**—Prize Medal 1862, and Silver Medal, Paris, 1867. "For Excellence of Manufacture of Medicine Chests, and for an ingenious method of fitting Panniers for Military Service."
